EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Byers on 4/4/2005.

The application has been amended as follows:

On line 3 of claim 1, after "alkylating agent", --which is selected from the group consisting of propylene, propyl alcohols, and the mixture thereof -- has been inserted.

On the line next to the last line of claim 1, before ",", --to produce dimethylcumenes-- has been inserted.

On the last line of claim 1, "the products" has been replaced with --dimethylcumenes--.

Claim 6 has been deleted.

The following is an examiner's statement of reasons for allowance: the closest prior art of record does not disclose or render obvious a process, as called for in claim 1, for production of dimethylcumenes by alkylating xylene(s) with propylene and/or propyl alcohols in the presence of a solid acid zeolite catalyst selected from an ultrastable zeolite Y having a Si/Al of 5 to 50 and a beta zeolite having a Si/Al of 10 to 120 to produce dimethylcumene which is separated in vapor phase. The closest art Steigelmann et al (5,118,896) discloses an alkylation process of an aromatic such as xylene, benzene with an alkylating agent such as propylene and isopropanol by

using beta or Y zeolite. However, the reference is silent as to the ratio of Si/Al of zeolite.

Further, the reference is silent as to dimethylcumene as the product of the alkylation which is separated in vapor phase.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
